Monoclonal Antibody to Bovine IL-2

PF647P CONJUGATED

Antibody: MT3B3

Product code: 3111-72-100T

Size: 100 tests

Immunogen: Recombinant bovine IL-2

Isotype: Mouse IgG1

Specificity: Native and recombinant bovine IL-2

Contents: Ready-to-use solution of conjugated antibody in sterile filtered (0.2µm) PBS with 0.2% BSA and

0.09% sodium azide.

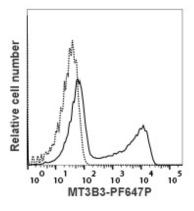

Purification: Purified from *in vitro* cultures by protein G affinity chromatography.

Conjugation: The MT3B3 antibody has been conjugated to PF647P.

Storage: Store product at 4-8°C or frozen at -20°C or below. Avoid repeated freezing/thawing.

Applications: Detection of IL-2 producing cells by flow cytometry. 5 µl is recommended for staining of 1 million

cells in a total volume of 50 µl.

Detection of IL-2 by flow cytometry in viable bovine PBMC. Cells were stimulated for 5 hours in the presence of PMA/ionomycin and Brefeldin A. Cells were then fixed and permeabilized using 4% paraformaldehyde and saponin, and subsequently stained with anti-bovine IL-2 mAb MT3B3-PF647P (solid line). Matched isotype control antibody MT128 (available from Mabtech, product code 3612-72-100T) (dashed line). The histogram derives from gated events of typical lymphocyte characteristics in forward and side light scatter. Flow cytometry was performed on a BD FACSVerse system.

Note; for research use only.
