## Monoclonal Antibody to Human IL-4

## PF488P CONJUGATED

Antibody: IL4-3

**Product code:** 3410-71-100T

Size: 100 tests

**Immunogen:** Recombinant human IL-4

**Isotype:** Rat IgG1

**Specificity:** Human IL-4. Cross-reacts with IL-4 from cynomolgus macaque. Please visit www.mabtech.com for

information on reactivity with other monkey species.

Contents: Ready-to-use solution of conjugated antibody in sterile filtered (0.2 µm) PBS with 0.2% BSA and

0.09% sodium azide.

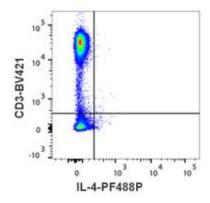

**Purification:** Purified from *in vitro* cultures by protein G affinity chromatography.

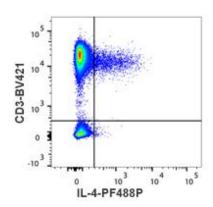

**Conjugation:** The antibody has been conjugated to PF488P.

**Storage:** Store product at 4-8°C or frozen at -20°C or below. Avoid repeated freezing/thawing.

Applications: Detection of IL-4 producing cells by flow cytometry. 5 µl is recommended for staining of 1 million

cells in a total volume of 50 µl.

Detection of IL-4 by flow cytometry in viable human PBMC. Cells were stimulated for 16 hours in the presence of PMA/ionomycin and Brefeldin A. Cells were stained with anti-CD3-BV421, fixed and permeabilized using 4% paraformaldehyde and saponin, and further stained with PF488P-conjugated mAb IL4-3 (right panel). Non-stimulated cells shown as reference (left panel). The dot plot derives from gated events of typical lymphocyte characteristics in forward and side light scatter. Flow cytometry was performed on a BD FACSVerse system.
