Monoclonal Antibody to Human Interleukin-12/-23 (p40)

BIOTINYLATED

Antibody: MT618

Product code: 3450-6-1000

Quantity: 1000 μg

Immunogen: Recombinant human IL-23

Isotype: Mouse IgG1

Specificity: Native and recombinant p40 subunit of human IL-12 and IL-23. The antibody

recognises p40 monomer, p40 homodimer, p70 heterodimer (p40+p35) and IL-23 heterodimer (p40+p19). The antibody cross-reacts with native p40 from rhesus and cynomolgus macaques and recombinant p40 from rhesus macaques. Please visit

www.mabtech.com for information on reactivity with other monkey species.

Concentration: Supplied at 0.5 mg/ml in sterile filtered (0.2 µm) PBS with 0.02% sodium azide.

Purification: Purified from *in vitro* cultures by protein G affinity chromatography.

Biotinylation: Biotinylated through reaction with a N-hydroxysuccinimide ester of biotin.

Storage: Store product at 4-8°C or frozen at -20°C or below. Avoid repeated freezing/

thawing. The expiry date indicates how long unopened products, stored according to

instructions, are recommended for use.

Applications: For quantification of IL-12/-23 (p40) in solution e.g. cell culture supernatants using

ELISA and for enumeration of IL-12/-23 (p40) producing cells using ELISpot. MT618 is recommended as detection mAb in combination with coating mAbs

MT86/221 (product code 3450-3).

Protocols: Please contact Mabtech for ELISpot and ELISA protocols.

Note; for research use only.

Mabtech shall not be liable for the use or handling of the product or for consequential, special, indirect or incidental damages therefrom.
